About Me

I'm a self-taught developer and I'm extremely passionate about computer technologies and always curious to learn bleeding edge stuff. I'm currently researching about WebApis, Micro-Service Architecture & WebAssembly. I got into computer technologies when I was 15 years old and I've been teaching myself how to code beautiful applications ever since. I've mostly worked as a freelance developer and currently looking for something to kickstart my career and to pursue things in a professional setup.
